DETAILED ACTION

Please disregard the previously mailed supplemental notice of allowance dated 10-5-2005. An inadvertent error in mailing. A non-final action will follow below.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 33 recites the limitation "at least one electrical parameter automatically determined as a function of a component value of the electrical circuit". This limitation has been cancelled in the base claim 39. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

4. Claims 13, 22, 27, 35, 37, 39, 42-45 are rejected under 35 U.S.C. 102(a) as being clearly anticipated by Matthews et al. (USP 6,396,576). See figure below.

Matthews discloses a charger (22), having charge parameters being variable (base on the battery/ battery pack, a battery/ battery pack (30), the arrangement outside the battery that senses both voltage (divider 38 and 40), and current sensor (50), the charge parameter are set by the very resistances (38, 40, and 50) that have a value dependent on a resistance of the corresponding of at least one of the resistors is

inherent to any resistor is being sensed by the charger circuit. See columns 4 lines 1-25.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 14, 17-19, 29-32, 34-40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Matthews et al. (USP 6,396,576) as applied to claims 13, 22, 37, and 39 above, and further in view of Braitberg et al. (USP 5,535,274). Matthews discloses the claimed invention except for the plurality and various types connection elements, and battery charger within the confines of a portable telephone. Braitberg discloses that it is known in the art to provide for the plurality and various types connection elements, and battery charger within the confines of a portable telephone. It would have been obvious to one having ordinary skill in the art at the time of the invention was made to provide the battery pack with monitoring functions of Matthews with for the plurality and various types connection elements, and battery charger within the confines of a portable telephone of Braitberg, in order to provide a universal physical and electrical connection to a plurality of different kinds of hand-held cellular telephone units. In one embodiment, a selectable adapter cable coding permits determination of the unique identity of the type of attached phone thereby allowing a data processing unit or the like to establish appropriate electrical interfacing support operations. A further purpose of the invention is to provide means to interface with a large number of hand-held and portable phones to achieve low cost electrical adapters that are useful with many makes and models of phones.

Response to Arguments

7. Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.
